

Wild Workshops

"Opportunity is missed by most people because it is dressed in overalls and looks like work." (Thomas Edison)

"Owned by associate and mad genius Gary Jones, Colormaker is our primary source of colors. Gary's Pentimento and Sgraffino lines are the only concrete skims (overlays) I've seen that actually work. They even look like real concrete! This is the only manufacturer that really 'gets it.'"
 --Miller the concretist, Benicia, California

Gary Jones with Mike Miller

Fees:

A non-refundable fee of \$875 USD for our three day workshops includes lunches for all days.

A non-refundable fee of \$599 USD for our 2 day workshops includes lunches for all days.

Don't miss this opportunity!

Participation is limited to **10 per workshop**, so be sure to register early to avoid disappointment.

...let your creativity go wild!

presented by **COLORMAKER**

Wild Workshops

"Start by doing what's necessary; then do what's possible; and suddenly you are doing the impossible" (St. Francis of Assisi)

Discover the COLORMAKER approach to hard surface flooring.

COLORMAKER invites you to unleash your creativity at one of our **Wild Workshops**. Each workshop explores exciting new techniques and innovative ideas. You will expand your knowledge of materials and develop leading-edge skills. Discover the latest methods in polished concrete coloration. Our *hands-on* workshops will challenge and encourage you, bringing your hidden talents to life. Our workshops provide a fresh perspective that you will be able to apply to your work immediately... and reap the benefits. Wild Workshops are an investment in your success!

Learn from industry leaders as they stretch the medium of visual concrete using color and form to transform cementitious floor toppings into works of art.

Levi Susoev was a farmer in Fresno, CA when he began to experiment with COLORMAKER products. In September of 2004, Levi attended one of our Wild Workshops. At left are samples of his work only 12 months later!

Explore & Learn:

- Installing first coat of Sgraffino on the floor and sample boards... with a different approach
- Application of Patinaetch - the chemical acid stains... watch your floor reveal the natural world through the use of color manipulation and found objects
- Pentimento - polymer modified topping/overlays... the only truly retrowelable topping
- Application of Someru Dyes... you, as the installer, almost become a spectator, watching, judging and coaxing as the dyes work their magic
- Creating art using objects like stencil, foams, paper resists, saw dust, metallics, etc. Saw cutting made easy - step outside the boundaries of traditional flooring, this work promises extraordinary inspiration with a large range of non-traditional coloring techniques
- Stencils... Modello Designs - Different types, application processes, an easy way to increase your sq. ft. price
- Application of Sealers and Finishes
- What can go wrong and the process of thinking creatively for solutions
- Discussion on estimating, pricing, ordering and shipping process and a look at the healthy financial rewards!

The Colormaker workshop was amazing! Not only will you learn about the Colormaker products, you will also learn all of the "insider" tips and tricks of the trade. Thank you!

Hilary McBroom, President, Rinnovi, Inc.
